

To whom it may concern,

My name is Levi Kane and as a former Team USA Paratriathlete (single leg amputee), I spent the past 5 years running my own personal training business and I made an absolute killing! Sadly, due to Covid-19, I have been forced to dissolve my business. But even through these dark times I have managed to see the light and use this opportunity to reassess my career path and dive into software engineering! Studying kinesiology and understanding the human body is extremely complex. I found that problem solving at a level of such complexity where everything is so interdependent upon everything else, was one of the biggest things that I LOVED about my previous career. Over these past few months, I have come to find that computer science is really a whole different level of complexity and I truly can't get enough of it! Just since May of 2020, I've managed to learn JavaScript, Python, SQL, HTML, CSS and some C# across multiple different Frameworks. I learn quickly and I'm eager to continue learning more! I hope my resumé finds you well and although my experience is limited in this particular field, I do believe that my drive and determination to learn, overcome and succeed, will be a great addition to your team!

Sincerely,
Levi Kane
